

Daniel de Souza Neris, Senior Full Stack Developer

Dubai, United Arab Emirates, +971505104408, danielneris01@gmail.com

LINKS	Portfolio , LinkedIn		
PROFILE	Senior Full Stack Developer with 7+ years of experience building robust web applications across the stack using React, Node.js, and TypeScript. Proficient in designing REST APIs, database architecture, and modern frontend interfaces with a focus on usability and performance. Comfortable working in Agile environments, shipping features rapidly, and contributing across product, DevOps, and frontend/backend layers.		
EMPLOYMENT HISTORY			
2025 — Present	Senior Software Engineer, Nova Information Technology		Dubai
	Contributed to the backend development of a KYC and compliance platform used by over 20,000 users in production. Developed secure APIs in Node.js and TypeScript, integrated third-party identity verification services, and ensured data privacy and performance at scale.		
2022 — 2025	Principal Software Engineer, Zuvia		Brazil
	Co-founded and led all technical initiatives at Zuvia, a tokenization platform that moved over \$75M in real estate assets and served 5,000+ users. Architected the entire product, smart contracts, React dashboards, backend APIs, and DevOps pipelines, supporting investor onboarding.		
2024 — 2025	Senior Software Engineer, SHSquads		Brazil
	Delivered backend systems and mobile features for 5+ fintech clients across Brazil. Helped clients go live faster with scalable Node.js backends and React Native apps, impacting 100K+ users.		
2021 — 2022	Lead Software Engineer, SkyDan		Brazil
	Co-founded and led the Web3 architecture for a gamified NFT platform with 10K+ active players. Built secure smart contracts, token gated access, and real time blockchain mechanics enabling the company to launch its first fully decentralized gaming experience.		
2019 — 2021	Software Engineer, Live On Solutions		Brazil
	Built and maintained 60+ white label fintech platforms, delivering custom admin dashboards, secure payment API integrations, and backend logic that supported 50k+ daily transactions.		
2018 — 2018	Software Developer, Amais Terceiro Setor		Brazil
	Developed internal tools for data management and reporting in the non-profit sector.		
EDUCATION			
2025	Bachelor's in Systems Analysis and Development, Descomplica Faculdade		Brazil
2024 — 2024	Intensive English Programme, Stellenbosch University		South Africa
	Web Development, Etec Comendador João Rays		Brazil
