

Daniel de Souza Neris

FULL STACK & BLOCKCHAIN ENGINEER

Profile

Full Stack & Blockchain Developer with 7+ years of experience delivering scalable platforms across fintech, tokenization, and Web3. Specialized in Solidity and the MERN stack (MongoDB, Express, React, Node), with a strong focus on decentralized applications, smart contract systems, and modern DevOps practices. Proven track record in building full-cycle solutions from backend to user-facing applications.

Employment History

Senior Software Engineer, Nova Information Technology, Dubai

MARCH 2025 – PRESENT

- Building backend services in Node.js for KYC and compliance applications.
- Integrating external identity verification services and handling secure data.
