

# DANIEL DE SOUZA NERIS

Senior Backend Engineer | Node.js · TypeScript · Distributed Systems · P2P

Dubai, United Arab Emirates | [danielneris01@gmail.com](mailto:danielneris01@gmail.com) | +971 52 961 8933 | [linkedin.com/in/danielneris](https://linkedin.com/in/danielneris) | [github.com/DanielNeris](https://github.com/DanielNeris)

## PROFESSIONAL SUMMARY

Senior Backend Engineer with 8 years of experience building scalable, production-grade systems in Node.js and TypeScript for fintech, banking, regulated finance and Web3. Co-founded Zuvia, a tokenization platform with R\$300M+ in transaction volume and 8,000+ investors, built on event-driven microservices and PostgreSQL. Experienced in API design, distributed systems, KYC/compliance, smart contract integration and cloud infrastructure. Currently focused on peer-to-peer, local-first and privacy-preserving distributed systems on the HoleyPunch/Pear stack.

## TECHNICAL SKILLS

**Languages & Frameworks:** Node.js, TypeScript, JavaScript, NestJS, Express, Next.js, React, Solidity

**Architecture:** Distributed Systems, Microservices, Event-Driven Architecture, REST APIs, GraphQL, Transactional Outbox, Saga Pattern, CQRS

**P2P & Networking:** HoleyPunch/Pear, Hypercore, Hyperdrive, Hyperbee, Autobase, Peer-to-Peer (P2P), User Datagram Protocol (UDP)

**Data & Messaging:** PostgreSQL, Redis, MongoDB, MySQL, Apache Kafka, OpenSearch, Prisma

**Cloud & DevOps:** AWS (EC2, S3), Docker, CI/CD, GitHub Actions, Jest, Cypress

**Web3 & Fintech:** Tokenization, Smart Contracts, Ethereum, Multisig Wallets, KYC/AML, Banking-as-a-Service

## PROFESSIONAL EXPERIENCE

**Senior Software Engineer, Nova Information Technology** | Dubai, UAE | Mar 2025 to Present

- Built KYC and compliance APIs in Node.js and TypeScript supporting 20K+ identity verifications.
- Reduced false negatives by 35% by integrating OCR, facial matching and liveness verification flows.
- Designed a release management and maintenance mode platform for 3 internal applications, modeling the release lifecycle as a state machine.
- Improved scalability and reliability by moving verification steps to asynchronous workflows and modular backend services.
- Delivered secure identity systems handling sensitive customer data under regulatory requirements.

**Principal Software Engineer & Co-founder, Zuvia** | São Paulo, Brazil | Sep 2022 to Mar 2025

- Built a real estate tokenization platform with Next.js, event-driven microservices and PostgreSQL, reaching R\$300M+ in transaction volume.
- Scaled the platform to 8,000+ active investors through reliable backend and product architecture.
- Delivered the platform behind Brazil's first real estate tokenization on B3 infrastructure.
- Integrated Solidity smart contracts and multisig wallets with Node.js microservices and investor dashboards.
- Designed a modular architecture with PostgreSQL, Redis and MongoDB, plus CI/CD pipelines for secure, reliable deployments.
- Led technical decisions across backend, product delivery and platform evolution.

**Senior Software Engineer (Contract), SHSquads** | São Paulo, Brazil | Oct 2024 to Mar 2025

- Delivered backend systems for 5 fintech clients supporting products with 100K+ users.
- Built production APIs and integrations with Node.js, Next.js and React Native.
- Helped launch scalable financial products in regulated environments, improving delivery speed and code quality.

**Lead Software Engineer & Co-founder, SkyDan** | São Paulo, Brazil | Aug 2021 to Sep 2022

- Designed Web3 and backend architecture for NFT and betting dApps using Solidity and Node.js.
- Led engineering execution while remaining hands-on in core product development.
- Improved delivery consistency through code reviews and architecture decisions.

**Software Engineer, Live On Solutions** | Jaú, Brazil | Jan 2019 to Aug 2021

- Built Banking-as-a-Service and lending systems using Node.js, React and PostgreSQL.
- Improved API latency by 40% through query optimization and backend redesign.
- Delivered financial systems supporting digital wallets, lending and real-money transactions.

**Software Developer, Amais Terceiro Setor** | Jaú, Brazil | Oct 2018 to Dec 2018

- Developed internal tools for data management and reporting in the non-profit sector.

## OPEN-SOURCE PROJECTS

- [retry](#):** Peer-to-peer asynchronous interview app on Pear with on-device transcription (Whisper) and answer review (Qwen3-1.7B); no server, no API calls.
- [udp-from-scratch](#):** Reliable transport over raw UDP in Node.js with zero dependencies: binary wire format, acknowledgements, retransmission and an anti-spoofing handshake.
- [event-driven-ecommerce-system](#):** NestJS microservices with Kafka, transactional outbox, saga with compensation, Redis distributed locks, DLQs and CQRS read model.

## EDUCATION & CERTIFICATIONS

**Technologist Degree in Systems Analysis and Development**, Descomplica | São Paulo, Brazil | Expected Dec 2026 | GPA 9.43/10

**Intensive English Programme**, Stellenbosch University | Stellenbosch, South Africa | Mar 2024 to Dec 2024

**Technical Course in Web Development**, Etec Comendador João Rays | Barra Bonita, Brazil | Jan 2018 to Dec 2018

**Computer Technician**, Etec Comendador João Rays | Barra Bonita, Brazil | Jun 2016 to Dec 2017

**Certified Blockchain Developer**, Blockchain Council | Nov 2025

## LANGUAGES

Portuguese (Native) | English (C1, Advanced) | Spanish (A2, Elementary)
